

ABHINAV GUPTA

Software Development Engineer with strong object-oriented design fundamentals, hands-on experience in Java/Spring Boot backend systems, MERN stack, and Blockchain. Practiced in Agile development workflows. Deployed production systems end-to-end. 422 DSA problems solved; Codeforces Pupil (rating 1383).

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript, Solidity

Frontend: HTML, CSS, Bootstrap, Tailwind CSS, React.js

Backend & Database: Node.js, Express.js, Spring Boot, MongoDB, MySQL, PostgreSQL

Blockchain: Solidity, Web3.js, MetaMask, Ganache, Truffle, Remix IDE

DevOps & Tools: Git, GitHub, Docker, CI/CD, Linux, JWT, REST APIs, Postman, Railway, Vercel

CS Fundamentals: Data Structures & Algorithms, OOP, OOAD, Computer Networks, Agile / Scrum

WORK EXPERIENCE

Software Developer Intern — Codeeater — Remote, Delhi

Aug 2023 – Oct 2023

JavaScript | MERN Stack | Solidity | Web3.js | Agile | Linux

- Designed and deployed 3 Ethereum smart contracts in Solidity using object-oriented design principles, covering 6+ on-chain operations (listing, bidding, ownership transfer); wrote unit tests on Ganache achieving full function-level test coverage before mainnet deployment.
- Integrated smart contracts with React frontend via Web3.js and MetaMask; applied gas-optimisation techniques (loop refactoring, storage packing, re-entrancy guards) reducing estimated gas costs by ~15%.
- Worked in an Agile team, participating in sprint planning and daily stand-ups; managed version control via Git on Linux, maintaining clean branch strategy across feature and release branches.

PROJECTS

BookKaro — Ride-Hailing Platform | github.com/ABHINAVX03/Book_Karo-backend-Spring-boot- | book-car-frontend.vercel.app Java | Spring Boot | React | PostgreSQL | Docker | CI/CD

- Architected a production-grade ride-hailing REST API using OOP and layered Controller–Service–Repository design in Spring Boot 3.3.1 — 5 JPA entities, 10+ endpoints covering the full ride lifecycle (request, accept, start, end, payment, rating).
- Secured all endpoints with JWT + Spring Security; resolved a CORS production outage between Railway (backend) and Vercel (frontend) by configuring a global CorsConfigurationSource in the Security filter chain, restoring service in under 2 hours.
- Containerised with Docker and set up a CI/CD pipeline for automated build and deployment to Railway on every main-branch push; React frontend auto-deployed on Vercel.

Travel World — Full Stack Travel App | github.com/ABHINAVX03/Travel_World | traveling-world-client.vercel.app MongoDB | Express.js | React.js | Node.js | JWT

- Built a full-stack MERN travel booking application applying OOP patterns (MVC architecture) with JWT auth, bcrypt password hashing, and an admin dashboard with full CRUD over tour packages from an external API.
- Implemented role-based access control with protected routes on both client and API layers across 3+ MongoDB collections; deployed via CI/CD to Vercel.

Voting DApp — Blockchain Voting System | github.com/ABHINAVX03/Voting_Dapp | votingbeta.netlify.app React.js | Solidity | MetaMask | Ganache | Unit Testing

- Developed an on-chain voting application with full unit test coverage using Truffle and Ganache — every vote stored with a unique wallet address; voter eligibility (18+) enforced directly in the Solidity contract.
- Integrated contracts with React via Web3.js for MetaMask wallet auth and one-click vote submission with on-chain transaction confirmation.

EDUCATION

Master of Computer Applications (MCA)

2025 – 2028

IIIT Vadodra (Indian Institute of Information Technology) | GPA: **8.5 / 10**

Gandhinagar, Gujarat

Bachelor of Computer Applications (BCA)

2021 – 2024

Guru Gobind Singh Indraprastha University (GGSIPU) | GPA: **9.2 / 10**

Rohini, Delhi-NCT

ACHIEVEMENTS & CERTIFICATIONS

- Solved 422 DSA problems on LeetCode and GeeksforGeeks; Codeforces Pupil (rating 1383, handle: lazyhazard03); Java (5★Gold) and React.js certified on HackerRank.
- Coding Society Representative at GGSIPU — organised 3 inter-college coding contests using Agile sprint methodology, coordinated 40+ student programmers.
